

ENTUMOTO SAFARI CAMP - POST COVID-19 POLICY MEASURES

Entumoto Private Safari Camp stands elevated in the hills of a private and secluded escarpment, commanding breath-taking views and sunsets over the Mara plains. Intimate and exclusive, it is designed to provide for your total comfort in the heart of Africa. On the border of the legendary Maasai Mara reserve, we are privileged to be part of the world's most spectacular wildlife sanctuary, and even more so, we have our private conservancy teaming with game.

MEASURES PUT IN PLACE:

- The Conservancy is private, all the activities will take place with minimal interactions with other people and game drives.
- Social distancing will be observed - Our tents are 40 to 100 meters apart. Each tent has its own functional facility if one is not comfortable using the one in the common areas.
- Open land cruiser and electric land rover for game drives to be shared among family members or minimal number of guests per vehicle.
- We have two dining areas, the pool area, private verandas, and picnic spots for meals at breakfast, lunch and dinner which can comfortably offer personalized service and social distancing
- Each tent has a designated room steward who attends to each family. Staff are well trained and will observe these hygiene measures. Each will be provided with alcohol-based sanitizers and masks.
- Tents are thoroughly cleaned with antibacterial environmentally friendly detergents. Alcohol based sanitizers will be provided in each room and in all public places strategicly positioned for use. Bedsheets and towels will be changed with fresh ones every 2 days
- Our guides will ensure that the outside/inside of the vehicle is thoroughly cleaned and sanitized after every game drive. Strict hygienic measures for camp guests and on game drives (available hand wash, alcohol-based sanitizers, and masks). Walking safaris, running safaris and Mountain biking are very safe with the guests
- No buffets, all meals served by waiting staff with strict hygienic discipline, wearing masks, which also goes for kitchen staff
- Thermal scanners will be used as a precaution to test the guests and staff to be certified Covid-19 free
- The ministry of health shall provide a certificate to show that we have attained recommended standard for health and safety for guest and staff prior to operations. We will also engage a resident nurse inhouse
- We have an existing cooperation with WWF to ensure a sustainable wildlife and environmentally friendly camp which is certified as an eco-rated camp by the Eco-Tourism Kenya. Our role as a reliable local employer and in addition supporting the close-by Masai community through our community work
- We will ensure that we secure for all our guests an Amref Flying Doctor evacuation insurance cover.

Like you, we are eagerly anticipating the reopening of travel and the return of tourism. As we wait, we wish you and your families good health.
